### IN THE CLAIMS

23. (Original) The method of claim 47 19, further comprising the steps of: defining a second network data collector including a second encapsulator, a second aggregator, and a second data storage system;

receiving a second set of network data via the second network encapsulator;

Application/Control Number: 09/560,032

Art Unit: 2144

processing the second network data set via the second aggregator, including the steps of defining a second rule chain and applying the second rule chain to the second set of network data to define a second set of aggregated network data; and

storing the second aggregated network data set in the second data storage system.

# Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Claims 13-16, 19-23 and 26-31 are allowed. Prior art failed to teach a method of recording network usage in which a first and second rule chain are applied to a network session data and network usage data respectively to construct an aggregation tree in combination with all the elements of each independent claim as argued by the Applicant (See Page 16, line 20-Page 19, line 20 of Applicant enabling specification, Page 12 line 24 –Page 13 line 26 of argument presented 8/25/2004).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
